

EXNO: 10

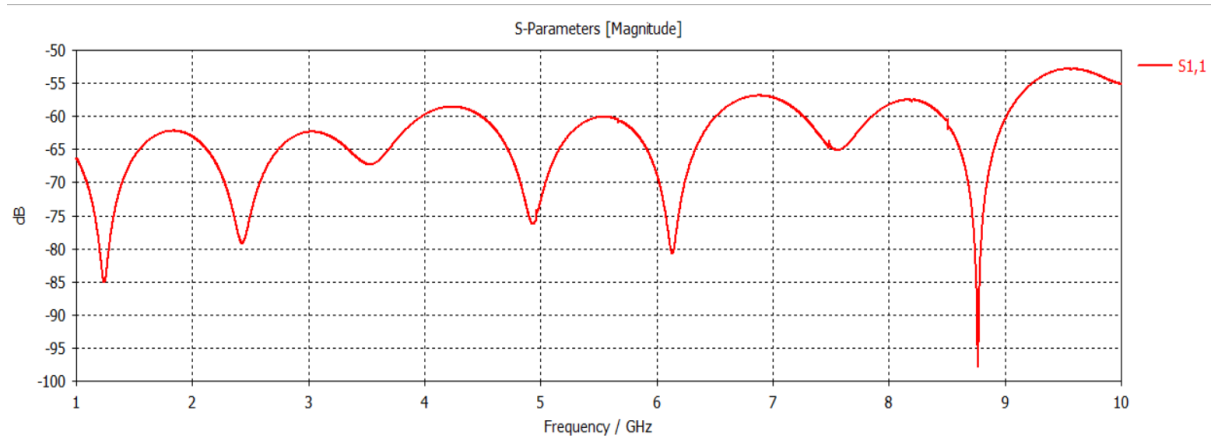

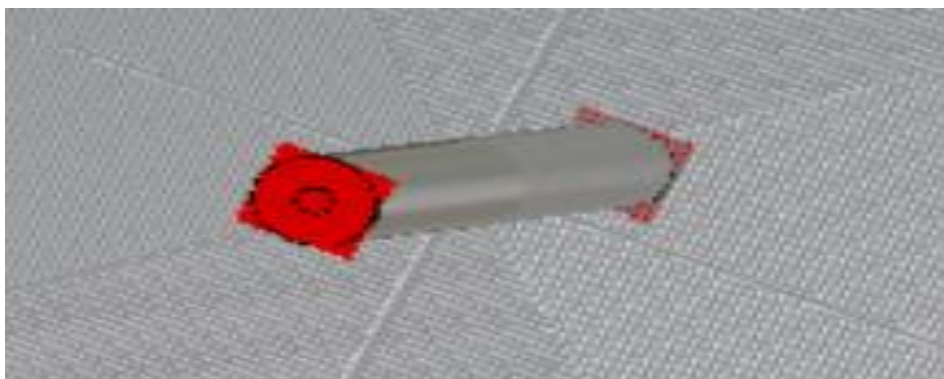

Simulation and Analysis of a Coaxial Connector Using CST

Studio Suite and examining the power distribution among ports and S-parameters.

Test Case 1:

To simulate a coaxial connector using CST Studio Suite, analyze its electromagnetic behavior, and examine the power distribution among ports over a specified frequency range.

Port (i-input,o-output)	Time (ns)	Power W1/2
I1	0	1
O1,1	0	0
O2,1	0	1

Test Case 2:

To simulate a coaxial connector using CST Studio Suite, analyze its electromagnetic behavior and examine the power distribution among ports over a specified frequency range.

FREQUENCY (GHz)	S Parameters Magnitude (dB)
S11	-20
S21	-0.5
